

## Independent Review Statement for GHG Calculations

nova-Institut GmbH (nova) was commissioned to conduct an independent review of the greenhouse gas (GHG) calculations done by Peter Greven GmbH & Co. KG („Peter Greven“) for the site in Bad Münstereifel, Germany.

Peter Greven has provided GHG emissions for Scope 1,2 and 3 following the guidelines from the GHG Protocol<sup>1</sup> for the calendar years 2016, 2019 and 2020.

Based on the results of our verification process, nova found **no evidence** that the GHG emissions statement:

- is not materially correct and is not a fair representation of the GHG emissions data and information;
- has not been prepared in accordance with the GHG Protocol.

Hürth, 15.06.2021

Matthias Stratmann  
Head of sustainability, nova-Institut GmbH

*nova-Institute is a private and independent research institute, founded in 1994; nova offers research and consultancy with a focus on the transition of the chemical and material industry to renewable carbon. We offer our unique understanding to support the transition into a climate neutral future.*
